**RESPONSE TO OFFICE ACTION MAILED NOVEMBER 9, 2001**

Responsive to the Office Action Mailed November 9, 2001, Applicants respectfully request the Examiner to re-examine the above-identified application in view of the following Remarks.

**REMARKS**

**In the Claims**

Claims 1-6 are pending in the application

This invention relates to a very convenient storage system of articles which consists of at least two telescopic profiles capable of receiving one or more product holders which are suspended therein such that they can slide in a longitudinal direction, i.e., in the direction of telescopic movement, while being rotatable as well. This makes it possible to adapt the pitch between subsequent product holders to the size of the product in order to maximize the storage capacity, which the rotational freedom of the individual product holders allows a rotation of the product holder over 90 degrees so that a product is nevertheless readily accessible while
